

Waterproof Wireless Display

Watch where you want

Watch where you want

Bathroom

Watch your favorite TV series while relaxing in your bath or whirlpool.

The NU wireless display is specially designed to withstand the toughest conditions including high humidity

The ergonomic, slim & lightweight design (only 4.5kg) ensures the NU wireless display can be taken and placed anywhere! Even in restricted corners in the kitchen.

Enjoy a cooking programme or watch the news while cooking or doing the dishes. And don't worry about spilling some water or food. The NU wireless display is water resistant and food rests can be easily wiped off.

Outdoors

Want to enjoy the summer sun but not miss an important football match?

The NU waterproof wireless display can receive wireless TV signals within a range of 30m, making it ideal for use in the garden, on balconies and other places where no electrical power sources are available!

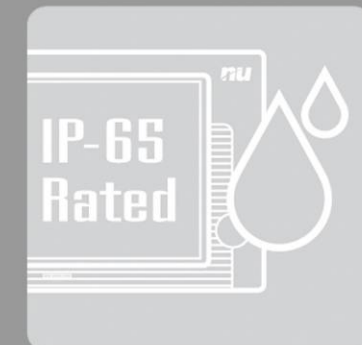

And if it starts to rain, don't worry about leaving it outside for a while. Attend to your washing on the line or close your windows first. The NU wireless display doesn't mind a bit of rain.

- o Water resistant and humidity proof (IP65 standard)
