Evening/Other Tel: [] Email address: []

Date Required: [/ /]

Note 1: This date is for pipeline forecast/order placement only and cannot be guaranteed by PSCo or a third party. Clients will be notified of a prospective delivery date some time after the site survey has been undertaken. Typical waiting time could be 2-3 months (guide only – advice available when ordering).

Note 2: Orders cannot be accepted prior to the completion of a successful survey.

Preliminary (Pre-Site Survey) Questionnaire:

A. Type of Installation: [Floor / Wall / Flown]

Note 3: Floor-mounting option requires Panasonic **TY-WK103PV9** (at extra cost).
Wall-mounting option requires Panasonic **TY-ST103PF9** (at extra cost)

B. On which floor of the building is the proposed installation to take place? []

C. On which floor would the product enter the building (if other than ground) []

D. Is there a lift capable of conveying the product to this floor? [Yes / No]

Note 4: Check internal size and weight handling capability of lift. Be aware that most passenger lifts are unlikely to be large enough to accept the flight case in which this product will be delivered in.

Note 5: This unit will not be handled manually and cannot be carried up stairs. It is possible to ramp the case up 3-4 steps providing there is adequate space at the top and bottom for the flight case (see dimensions and weight below)

Weight (in flight case) – 500kg, (uncased) – 220kg
Flight case dimensions (length/width/height) – 2600x700x1750mm

E. Type of floor construction? (if known, e.g. timber, concrete)

F. Type of floor finish/covering? (carpet, tiled, wooden)

G. Type of wall? (if not floor-standing or flown – e.g. Interior/Exterior/Brickwork/Plasterboard)
